SUMMARY

I have worked on many platforms from full-stack web to desktop, mobile apps, and databases. My expertise is in delivering high-quality software solutions, quickly learning new technologies, and deliver on time.

EDUCATION

University of Delhi   Delhi, India
B.Tech in Computer Science; Marks: 57%   *Aug, 2013 - Aug, 2017*

EXPERIENCE

2.) Delinno   Gurgaon, India
Software Developer   *Feb,19 - May,20*

I worked on many interesting projects during my period in the company, I quickly grew by picking up new technologies and later on got the opportunity to lead a project (Online Fitness Course Platform) with a team of 3 where I mentored the team, delegated tasks and conducted code reviews to provide a quality solution to the client.

Projects I worked on during my time in Delinno:

- **Digital CSR Platform**
  Responsibilites: Add new features, Fix bugs, Refactor existing code to improve code quality, and refactor mobile app UI to by removing antd mobile and using antd so that it looks good on the desktop as well as mobile platform.
  Tech: Node, Express, React, AntDesign, Less, Redux Loop, Postgres, Knex.

- **Online Fitness Course Platform**
  Responsibilites: Started the project from scratch, Lead a team of 3, flesh out tasks/ features for the team members, review code to maintain consistency, and quality code.
  Tech: Python, Django, React, MaterialUI, Redux Loop.

- **Online Survey Platform**
  Responsibilites: I was a part of a small team and worked on to bump up the React version of the existing custom component library which was used for admin and user app, Porting survey dashboard app from Backbone to React.
  Tech: Python, Django, React, Backbone, Redux Loop.

- **Gym CRM**
  Responsibilites: Enforce Eslint in the project, GitLabs CI Setup, fix bugs, write API tests, and add new features requested by the client.
  Tech: Python, Django, React, AntDesign, Redux Thunk.

1.) TechConnect   Gurgaon, India
Software Developer Intern   *July, 2018 - Dec, 2018*

I was responsible for converting PDS files to HTML, Making WordPress themes, Updating the content of existing Wordpress website, and Testing of new websites created by the company.
Tech: PHP, Wordpress, HTML, CSS, JavaScript, Jquery, LESS, SASS, Gulp.

PROJECTS

- **Whatsapp Bot:** Made with Python and Selenium, can be used to send multiple messages and send messages as characters made of emojies

- **File Locker:** File locking application for Windows built using C++ QT Framework. The Application uses Windows' mandatory file locking mechanism to lock and unlock files.

- **Snake Game:** Clone of the classic snake game built built using, JavaScript and p5js framework.

- **Unchained Torrent:** A Django based website where a logged in user can upload a file and anyone can search and download the file.

SKILLS

Fontend: HTML, CSS, Less, Scss, JavaScript, React, Redux, AntDesign, MaterialUI.
Backend: Python, Django, NodeJs, ExpressJs, Rest API.
Database: Postgres, Knex, ORM.
Other: Git, VIM, CI/CD, Latex.
